VICTORY MOUNDS

FOR THE WIN

Hilltopper Mound Clay = Less Work and More Time

Save valuable time and money working on your pitching mounds with Hilltopper's Mound Clay. The clay has a patented polymer technology which replaces moisture content. Use the clay right out of the bag with a proprietary double screening process, and waterless eliminates the variability that comes with water and clay particles.

Hilltopper Mound Clay

This mound clay is used by numerous Victory Mounds customers and one of our most popular field products.

Infield Mix and Field Dry Ready to Go

Victory Mounds sells a variety of premium Stabilizer Solutions products such as: Stabilizer, Ballyard Clay, infield mixes consisting of "Pro Red", "Gold", and "Ballyard", as well as Warning Track Mix. Field Dry is a popular product as well.

Ballyard Clay

The stabilized infield mixes are the best solution for loose and/or dry age-lime infield surfaces. Using patented Stabilizer water binding technology, the infield mix binds and tightens loose dirt while keeping dust down to maintain ideal field conditions. This helps with game day maintenance, and can be used as field dry in some circumstances. This product is also effective at filling lower spots and heavy wear areas such as around the bases. The stabilized infield mix is available in 1-ton sacks or 50-pound bags and stocked for the season!

"Gold" Infield Mix

Stabilizer and Field Dry

Increase Performance Reduce Downtime

Your field's quality is one of the first things players and coaches notice when arriving at the ballpark. That's why Victory Mounds is an authorized national distributor of Stabilizer Solutions.

Stabilizer Solutions' patented technology and products stabilize the relationship between water and soil particles resulting in more play from natural materials.

Order your field products from Victory Mounds to help your field lead the league in quality, playability, and visual appeal.
